

AIDS:
HEALTH AND SURVIVAL
STRATEGIES

A Conference

Saturday Oct 22 & Sunday Oct 23, 1989
Provincetown Art Association

Presentations by:

Dr Nathaniel Pier A New York Physician at the forefront of AIDS treatment and research affiliated with the Community Research Initiative (CRI) and Beth Israel Medical Center in New York. "The top priority for people with AIDS and people who care about AIDS is to demand access to experimental therapies to try to save their lives."

Lark Land Head of Positive Immunity, a Washington based education program for people with AIDS, ARC, and HIV+. Positive Immunity believes: "HIV is not a death sentence, and by applying the principles of holistic health you can return to a state of health and well being."

Tom O'Connor Eight years a PWARC and the author of Living with AIDS: Reaching Out which takes a how-to-survive approach, examining how people with AIDS and ARC can improve the quality of their lives.
