GUIDE

1987

Provincetown's unique environment explains America's most prolific art colony and its impact on 20th century art in America. A fishing village made up of narrow streets, clapboard and shingled cottages with Cape roses and old fashioned gardens, intense sunlight reflecting off the bay and dunes coupled with a population that stimulates the imagination produces an ideal milieu for the creative mind. Provincetown artists are represented in every major American museum. We invite you to view the works of those artists and the ones of the future in the following galleries.
