

Dearest Dad-

The other day in the letter to Mother I told about all the new antics of mthong - Now I'll tell you of all the new antics of our building - The studio is insulated and the boarding is in - inside shutters have been put over the louvers on pulleys - so that they can be opened for ventilation - When wanted as such - a long work table has been made along one wall - that is wonderful for doing drawings - I am sending for enough of the new transparent plastic Vinilite, that I investigated re. Murray job, to cover the window to provide a dead air space there and still admit enough light - I have not decided on a finish for the wood - the pattern of the

boarding is too nice to be lost with
thick paint. George Mercer suggested
a thin ~~temporary~~ coat that could be
rubbed off & I felt that might be best
too - at the moment I am letting it go -
By the way could you see if you could
find a tall stepladder down there -
The ceiling is $15^{\text{to}} 16$ feet and a ladder
 $13^{\text{to}} 14$ feet tall would allow the
work to be done at leisure and with
out the erecting of a large scaffold -
There is nothing available here and
if you could find one it would be
a great great help as we need one
for many purposes -

On the little house the windbreak
catch all room has been added -
The storm windows still have to be
made also a few shingles put on the

any sureness of taste or instinct - However
I am sending a sample presentation
in a few days - Victor Resenfeld had
dinner with her several days ago and
called me afterwards - said he could
not pin her down to anything - thinks
she will offer me something small
(one room) to do as a trial. However a
floor is my smallest limit - one
room would not be worth going
down for unless it were with
very specific further attachments -
I will let Muriel handle the deal from
the sketches on and give her the
same percentage as Gilbert namely 10 -
She said she wanted nothing so
she can put it to Anthony's account if
she wants to.

outside of house. There are a few bales of
rock wool left from studio so we will
tuck it in the walls of windbreak + cover
over with masonite - It will serve as a
bed room for Anthony next summer or a
kitchen - It certainly will be a help this
winter to store things that we otherwise
keep out of doors - The Roses are down at
Allen Hunt's now but will be back
to finish up the little things soon -

Now about the jobs - A letter from
Gilbert today with another enclosed
from Nat Salton stall - The job has been
held up because of permits from ^{the} C.P.A.
but otherwise the job is mine - when
and if - So that is interesting - as a
whole the job interests me 10 times
more than Mrs. Murrays little deal
She makes a rather bad impression a
nervous unsure little Jewish lady without

As yet no one has said "yes" and
no one "no", so we are as always -
However we are extremely happy and
look forward to seeing you sometime in
the winter - It is extremely beautiful
here now - quite the most beautiful
October in years - warm and golden.
We went cranberrying with Mary
yesterday - used the scoop Mrs Gahm
gave us - got half a bucket in no
time. It is such a relief after New York -
I have gotten to be a real kick - It's
alright for a visit.

Enclosed is a note from Aggie Ball
that might interest you - I will either
write him or stop in to see him sometime
soon.

~~W.M.W.~~ We have packed up another batch
of current best sellers & novellers for

Pauline - will get them off the next
trip to town. We will keep her supplied

For the moment this covers
the home front -

Anthony is well and as charming
as always -

All our love

Fritz

P.S. We saw Wayne Harniss while
in N.Y. He's as batty as ever -
