

flotsam and jetsam

Our office and printing plant on Bradford Street is fast becoming more modern and the most attractive print shop on the Cape. Last Saturday another new piece of equipment was delivered. This is a completely automatic folding machine, which we understand will fold just about anything and works at such a fast clip that brochures, pamphlets, programs or what-have-you can practically be folded while you wait.

After being one of the heartiest proponents of the Clean-up, Paint-up, Fix-up Campaign, we know someone's going to pick us up on the not-so-very neat condition of part of our building. But we hope everyone understands that it's difficult to be neat when tearing down a building, and we'd like everyone to know that after the old Marine Hall is no more, our building will be neater, cleaner and a greater asset to the town by being able to offer off-street parking for our customers. So, Clean-up Committee, bear with us, and keep us in mind for one of those blue ribbons.
