FORM B - BUILDING

--	--	--	--

ARCHITECTURAL DESCRIPTION

see continuation sheet

Describe architectural features. Evaluate the characteristics of this building in terms of other buildings in the community.

6 Pleasant Street is a 2-story, 3-bay dwelling. The hipped roof is sheathed in asphalt shingles, and has a gabled dormer on the south slope. The building faces south toward Commercial Street. A stuccoed chimney is located on the east roof slope. A wood deck accesses the sidehall entry door, which is a replacement door with storm. The door and window surrounds are simple wood, and a wide frieze is present below that eaves. Windows are 6/1 DHS wood with storms. A 1-story hipped roof addition is located on the north facade.

HISTORICAL NARRATIVE

see continuation sheet

Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.

As per Tom Boland (1994): Federal in form and Greek Revival in detailing. Situated on a hill slope, and probably once commanding a harbor view, this house is located on all of the early maps and atlases. In 1880, the site was owned by Mrs. A. Knowles.
