FORM B - BUILDING

--	--	--	--

ARCHITECTURAL DESCRIPTION

see continuation sheet

Describe architectural features. Evaluate the characteristics of this building in terms of other buildings in the community.

6 Carver Street is a 2-story, 3-bay sidehall entry dwelling with a rear ell. The front-gable roof has partial returns and a frieze below the eaves. Large shed dormer, south slope; smaller shed dormer - north slope; shed dormer and brick chimney on rear ell. Corner pilasters indicative of the Greek Revival style. The main entry consists of double pane and panel doors with storms, shaded by a flat hood with end brackets - indicative of the Italianate style. A secondary entrance is located on the north facade with a transom above; another is located on the south side of the rear ell, with a brick stoop and iron railings. A wood deck extends across the front façade; panel balustrade. Fenestration includes wood 6/6 DHS windows with louver shutters; Chicago-style windows on south shed dormer; paired 6-light casements on south side of rear ell. Basement windows include 3/3 and 2/2 DHS and a 4-light window.

HISTORICAL NARRATIVE

see continuation sheet

Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.
