## FORM B - BUILDING

--	--	--	--

### ARCHITECTURAL DESCRIPTION

see continuation sheet

*Describe architectural features. Evaluate the characteristics of this building in terms of other buildings in the community.*

9 Alden Street is a 2-story, 3-bay dwelling sited slightly below street level with a steeply pitched front-gable roof on main block. The building has three sections - a main front gable core, a gable roof rear ell and a side gable roof addition. A flat roof section connects a rear side gable roof portion to the main front-gable roof section. The roof is clad in asphalt shingles; partial returns; shed wall dormer on north slope; exterior end brick chimney at rear gable end of main block. The rear ell has a shed wall dormer on south façade and an exterior concrete block chimney at the gable end. Corner boards and a frieze below the eaves are present. The building is clad in wood shingles, with the exception of plywood cladding at the flat roof section. The main central entry has a pane and panel wood door with modern aluminum storm. A secondary entry is located at the flat roof section. Fenestration includes 2/2 wood DHS windows.

### HISTORICAL NARRATIVE

see continuation sheet

*Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.*

### BIBLIOGRAPHY and/or REFERENCES

see continuation sheet

Recommended for listing in the National Register of Historic Places. *If checked, you must attach a completed National Register Criteria Statement form.*
