

Dear Claud — (1)

I feel this is a
very important book
of dates, information,
etc of Province town
handwritten by Man-
and should be on
display - perhaps
opened to different pages
at different times -

in the Ptown Heritage
 Museum - You can see
 from these carefully
 written facts that Wan
always was so interested
 in Ptown, its history,
 the Life Savers, etc.

I don't know where
 all this information
 came from - perhaps

some of it out of old
 books on Ploum but
 certainly he knew ^{+ carefully studied} the
 history of the ^{Ploum} Life Savers,
 very, very interesting facts
 here —

The first few pages
 I would take out if
 I could but that might
 spoil rest of book & so

(4)

Your information - he
must have started writing
in this book when he
went on his flight to
Labrador - his own plane,
one he had built in
California - Charles Rocherill,
the pilot - it was the
first plane ever seen
in Uasin, so Katis says,
and they flew over territory

(5)

in Northern Labrador no
one had ever seen before—
surveyed Labrador coast
for maps of that territory—
of main and approaches—

Man jotted down
airplane schedule in this
book - items at end
things taken to Moravians
& for that plane trip -

But most all of the
book is Ptown's history
items, etc.

(6)

Good to have a visit
with Katie - here for
two weeks - sort of set
me back in all my
"doings" - so I'm at
it strong again now.

Road around here
fierce - ice - snow on ice -
more ice - more snow - very
difficult - & dangerous getting
in and out of here - the
hill at my entrance - a glare
of ice - but we're much

better off than others —
Buffalo — Ohio — etc!
wow!

Lots of Love to
you + Peggy — I'll
be writing more soon —

Miriam —

Kate thrilled with her
polar bear dish — but
I didn't give her the last

(8)

one you sent - I'm keeping
that for myself - the
best one you've made -
a beauty - !! Are
you sure I paid you for
it - I can't remember -

Love again -
Mina

My, what terrible
wrecks they had in the
old days - I've been
fascinated reading it
than myself -
