

The
year 1977
new con-
struction
began on a
half scale mo-
del of the fishing
schooner

Rose Dorothea.

The model spans
a 66'6" length and a
12'6" beam. When com-
pleted it will be the
largest indoor wood-
ship model in the world
a lasting memorial
to the fishermen of the
town of Provincetown
and to New England's
building tradition.

The entire project
has been funded and
supported through the
Provincetown Historical Association
with individual contribu-
tions from friends of the
Heritage Museum

with THE SAIL CLUB

JOHN and JUDY CICERO

RUTH HIEBERT
