FORM B - BUILDING

--	--	--	--

ARCHITECTURAL DESCRIPTION

see continuation sheet

Describe architectural features. Evaluate the characteristics of this building in terms of other buildings in the community.

Currently "the Bradford-Carver House"; 70 Bradford Street is a 1 1/2-story, 3-bay sidehall building. The primary façade faces Carver Street. Later alterations have reoriented the building to face Bradford Street. The primary (Carver Street) façade has a sidehall entrance, and the recessed door is flanked by pilasters and capped by a heavy entablature. The windows have wood surrounds and operable shutters. The window trim is reflected in original window locations on the Bradford Street façade. Corner pilasters are also present. The Bradford Street façade has a frieze below the eaves. A shed-roofed dormer was added to this roof slope, and a square bay window was added to the façade during late 19th-century alterations. An addition has been added to the rear of the building (the side of this façade), and this accommodates a secondary entry. This entry is protected by a flat-roofed hood supported by brackets. A gabled dormer is present on the side gable roof slope of this addition. A brick chimney is located at the main roof ridge of the building. A gable dormer and skylight are located on the north roof slope. Roof is clad in octagonal-shaped asphalt shingles. A 1-story square addition with a wood 6/6 DHS window is located on the north façade.

HISTORICAL NARRATIVE

see continuation sheet

Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.
