## FORM B - BUILDING

### ARCHITECTURAL DESCRIPTION

see continuation sheet

*Describe architectural features. Evaluate the characteristics of this building in terms of other buildings in the community.*

This is a 1-story former automotive shop. The monitor shaped roof, with a parapet wall that is higher in the middle than on the sides, provides symmetry on the primary façade. However, the fenestration no longer follows that symmetry. The large garage entry door, formerly in the central building bay, has been replaced by double-door pedestrian entry with 1 2/2 DHS window on 1 side and triple 2/2 DHS windows on the other side. A series of small, single-pane triple windows are located above. A set of triple 2/2 DHS windows is located in the bay on the right side of the façade, while a small cargo door and a pair of 2/2 DHS windows occupy the left bay. The primary façade is lit by projecting light fixtures.

### HISTORICAL NARRATIVE

see continuation sheet

*Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.*
